Education

National Institute of Technology, Jamshedpur B.Tech,Computer Science and Engineering	2021-2025
Jawahar Vidya Mandir Shayamli, Ranchi AISSCE (Class XII), Aggregate: 75.8%	2018-2019
Jawahar Vidya Mandir Shayamli, Ranchi AISSE (Class X), Aggregate: 85.5%	2016-2017

Professional Experience

Software Development Engineer 1 (Full Stack .NET Developer)	
Surya Financial Technologies, Bangalore	March 2026 – June 2026

- Developed and maintained a large-scale enterprise financial behavior analysis platform (BA System) using a strict **n-tier** architecture (**C#, ASP.NET Web Forms, WCF services, DAL/DTO layers**), deployed on IIS, supporting both **Microsoft SQL Server and Oracle** for enterprise-grade database compatibility.
- Implemented and enhanced a critical Maker–Checker approval workflow for banking-grade regulatory compliance, enabling dual-control processing of financial master data using shadow tables (Sh_*), WCF SOAP services, and role-based approval screens for secure validation and production deployment.
- Worked across full Microsoft tech stack including **C# (.NET Framework), ASP.NET Web Forms, WCF (SOAP/WSDL services), ADO.NET, Entity Framework 6, jQuery, Highcharts, SSRS/RDLC** reporting, and **Oracle/SQL Server** integration, using tools like **Git, IIS Express, and Visual Studio** for development, debugging, and deployment.

Olcademy, New Delhi	Nov 2025 – Feb 2026
---------------------	---------------------

Software Engineer	
- Developed and maintained backend services using Node JS,Express JS, SQL Server, and REST APIs, implementing secure authentication and authorization mechanisms, optimizing database interactions, and contributing to scalable enterprise-grade application development. - Designed and executed comprehensive testing strategies, including Selenium-based end-to-end automation and API validation using Postman, increasing regression coverage, improving release stability, reducing manual testing effort by approximately 40% in a fast-paced startup environment.	

- Skills
- Languages:** C#, Java, C++, Python, JavaScript, Go, SQL.
 - .NET Ecosystem:** ASP.NET Core, ASP.NET Web Forms, Entity Framework, ADO.NET, WCF, IIS.
 - Web Development:** React.js, Node.js, Express.js, Spring Boot, REST APIs, HTML, CSS, Bootstrap.
 - Databases:** Microsoft SQL Server, Oracle, MongoDB, MySQL, PostgreSQL.
 - CS Fundamentals:** Data Structures & Algorithms, OOP, Operating Systems, DBMS, System Design, Computer Networks.
 - Tools & Platforms:** Git, GitHub, Postman, Maven, Vercel, Railway, Docker.
 - Testing:** API Testing (Postman), Automation Testing (Selenium), Unit Testing.

Projects	
Socketly Live Demo Github	
- Developed and deployed Socketly, a real-time multi-user Chat application using Node.js, Express.js, Socket.IO, WebSockets, JavaScript, HTML, and CSS, enabling low-latency bidirectional client-server communication. - Implemented instant messaging, live user-count tracking, typing indicators, connection/disconnection events, dynamic DOM updates, auto-scrolling, and responsive chat UI for concurrent users.	

AI Expense Tracker Live Demo Github	
- Designed and developed a full-stack expense management application using the PERN stack (PostgreSQL, Express.js, React, Node.js), implementing secure JWT-based authentication and RESTful CRUD APIs for expense management. - Integrated Google Gemini AI API to automate expense categorization, reducing manual data entry effort by ~60-70% through intelligent transaction classification. Deployed a production-ready application with separate CI/CD pipelines (Railway for backend, Vercel for frontend), implementing CORS policies and environment-based configuration for secure cross-origin communication.	

MERN Real Estate App Github	
- Developed a full-stack real estate platform using React, Node.js, Express.js, MongoDB, and Firebase, implementing JWT & Google OAuth authentication, role-based access control, protected routes, and secure deployment on Render. - Engineered scalable REST APIs and complete property CRUD with image uploads, optimized MongoDB schema design, robust validation, error handling, and responsive UI for a production-ready user experience.	

Certifications	
Secure Coding Practices (Surya Fintech, 2026) HackerRank Software Developer Certification (2025) Claude Coding Certification (Anthropic, 2026)	

Achievements	
- Solved 820+ Data Structures & Algorithms problems across LeetCode, Codeforces, CodeChef, GeeksforGeeks, and HackerRank (View consolidated profile: Codolio). - Ratings: Codechef (1417 Max) ,5* Hackerrank,1500+ Leetcode. - Stood Among top 1.5% of candidates in JEE Mains 2021 Qualified With Percentile-98.5 AIR: 14862 OBC : 3096.
